

DHRUV V KAMATH

(312) 479-4467 | dhruv.kamath@walmart.com | dhruvkam.github.io/mysite

I love building scalable, intuitive systems that empower teams to create cohesive, high-quality user experiences. Over the past 6 years, I have identified gaps in user experience and delivered design-driven solutions that enhance usability and efficiency. I thrive in teams that balance innovation with consistency, embrace rapid iteration, and foster a culture of collaboration and trust.

EXPERIENCE

WALMART (Fortune 1 retailer with market cap of \$700B)

Bentonville, Arkansas

Senior Product Manager, Finance GenAI

Oct 2023 – Present

- Led the discovery, development, and launch of a Generative AI chatbot to analyze annually \$130B in sales and expenses, providing personalized insights and enabling strategic decisions projected to reduce discretionary spending by up to 10%
- Launched an AI-driven planning and forecasting platform that empowers Merchants to manage \$10B+ monthly in merchandising decisions, achieving a 5bps improvement in forecast accuracy and a 20% reduction in manual handoff errors between teams.
- Awarded MAD award for reducing lead time of business process by 95% by creating an automation in Python using GraphX

SANDBOX AQ (Google X-incubated Quantum-AI B2B startup valued at \$4B)

San Francisco, California

Technical Product Manager, Quantum Cybersecurity

Jun 2022 – Oct 2023

- Launched self-serve open-source cryptographic platform that identifies network vulnerabilities using AI based graph traversal. Collaborated with UX, Data-science, MLOps, and operations teams to launch product in 2 months
- Reduced the mean lead time to deployment by 50% by creating and implementing a Product Feature Request (PFR) process to collate and prioritize customer requests from 20+ clients. Triaged backlog to drive the sprint planning process

CUEMATH (Series-C B2C EdTech marketplace valued at \$400M)

Bangalore, India

Product Manager, Growth

Aug 2020 – Jul 2021

- Conceptualized and delivered a revamped design system, driving a 45% NPS increase and a 50% revenue uplift. Led a cross-functional team to launch an MVP in 4 weeks, scaling to 100,000+ users.
- Led the growth funnel, including acquisition and engagement by delivering an AI driven experimentation tool to enable the sales team to deliver a personalized pitch to each customer. Increased monthly subscribers by 50% and revenue by 35%.
- Designed and executed A/B experiments and 30+ user interviews to improve gamification system resulting in 20% increase in module completion rate (key metric for measuring engagement and effort) and 25% increase in Customer Satisfaction (CSAT)
- Reduced monthly customer complaints by 85% by redesigning customer feedback process and implementing a self-serve resolution tool, decreasing Time-To-Resolution (TTR) by 25%

CENTRAL SQUARE FOUNDATION (Foundation supporting Government of India with educational interventions)

New Delhi, India

Product Operations Manager

Jun 2018 – Aug 2020

- Scoped, planned and executed \$80M project to deploy EdTech software and hardware across 5,000 schools. Informed rollout through Human Centered Design study with 300 students resulting in average 1.5 grade level improvement in learning outcomes
- Executed randomized control A/B experiments across 500+ schools to optimize program delivery. Reduced program delivery cost by \$1M and mean time-to-deployment by 10 days (or 33% of initial deployment time)

TEACH FOR INDIA (Education Non-Profit modeled on Teach for America)

Mumbai, India

High School Teacher, Grade 9 and 10

Jun 2016 – May 2018

- Developed a python-based tool to automatically send text messages to parents communicating their child's performance on homework and exams, leading to 35% increase in student attendance and 70% increase in homework completion rates

EDUCATION

THE UNIVERSITY OF CHICAGO BOOTH SCHOOL OF BUSINESS

Chicago, IL

Master of Business Administration (MBA)

Sep 2021 – Jun 2023

NATIONAL INSTITUTE OF TECHNOLOGY – TRICHY

Trichy, India

Bachelor of Technology in Industrial Engineering, Minor in Product Design

Jul 2012 – May 2016

ADDITIONAL

- Technical skills: Python, C++, HTML, SQL, R, Tableau, Figma, JIRA
- Developed Workgen, an open-source tool which analyzes 15+ student data points and generates customized worksheets
